ABOUT

Rudy Parra is a lab technician at GridFlow specializing in vanadium redox flow batteries for long-duration commercial energy storage, and lead software developer at Pii Energy, building a direct-to-consumer plug-in solar hybrid system for peak shifting and energy cost savings. A published physics researcher, he also serves on the Board of NM Tech Talks, directs the New Mexico chapter of Techqueria, and founded Q-STEM, a meetup for LGBTQ+ folks in STEM.

IN THE PRESS

TALKS ABOUT

- Clean-energy hardware — battery R&D and home solar
- Embedded systems & full-stack hardware products
- Building New Mexico's tech ecosystem
- Pathways into tech without a traditional route
- LGBTQ+ visibility and community in STEM

PV Magazine USA

"The theory and practice of plug-in solar"

ESS News

Pii Energy's 1.2 kW / 2 kWh plug-in home system

Awarepreneurs #371

"Bootstraps and Bootcamps" (podcast guest)

ABQ Business First

"The startup changing energy storage"
